Testimonial	Helen: "This worked really well on our rescue dogs who had the worst worm burden I have ever seen. They had several different deworming formulae and once they had a bit of sustenance and body condition, we incorporated the Cleansing Formula into their treatment with great results. It took us a total of 6 weeks to rid them of the worm infestation completely and get them to a point of health, with a few vet visits in between. They went to their new homes, healthy & robust!"
